

VISION

QDVC aspires to being a partner-of-choice and a responsible leader, mindful of the economic, social, human and environmental objectives towards Qatar National Vision 2030.

We firmly believe that sharing our experience and promoting synergies with the local community and business network is key to generating long-term premium value for our clients and being recognised as the company of choice in Qatar.

VALUES

Six values that act as common guide to drive everyday activities for each employee:

Client focused: through stakeholder listening, we understand client's needs and expectations and are continuously looking to achieve their satisfaction while delivering the project. We use our know-how and technological expertise for creating tailor made solutions to meet the very specific needs of each project.

Excellence: the projects are our priority and our people strive to continuously improve and innovate in order to provide the best experience for our clients and the end users. Through our company process approach and close management of risks and opportunities, along with our shared quality culture of "getting it right the first time" we are, all together, improving the overall performance of the company.

Accountability: we encourage everyone in our organization to work as a team, in cooperation with each other and to take responsibility for their actions. In order to do so, our employees are empowered with autonomy and given the necessary means to perform their tasks. We are accountable for the work as a team and individually, based on our level of responsibility.

Employee recognition: through a culture of care, we have created the conditions in which each employee can express their talent and fulfil their potential. We value our people, encourage their development and reward their good performance. In return, our staff are dedicated to the success of our projects.

Socially responsible: through our strong "safety first" culture, we take every step possible to ensure that everyone's health and safety is guaranteed on our worksites and to reduce our environmental impact. We are conscious of our corporate social responsibility and are convinced that developing local expertise through the Qatarization process will serve our company and help Qatar's sustainable development.

Integrity: we do "what is right" and we do "what we say we will do". Our employees represent our company's wealth and their diversity drives our success. They are to be ethically committed, act with transparency, respect human rights and caring for employee wellbeing. We promote equal opportunities, are honest in all aspects and treat people with respect and dignity.

MISSION

QDVC operates a well-structured sustainable business model with a high-performance culture, designing, constructing and operating, in an exemplary way, the Qatar major infrastructure projects of tomorrow or when suitable, abroad for international projects of interest.

We endeavor to develop a profitable, valued and inspiring local construction company, founded upon international standing and expertise, to maintain a long term relationship with our interested parties and to provide the highest level of satisfaction to our clients and employees.
